

The Leader in Event Critical Timing Electronics

RaceAmerica announces Rental Program for Drag Race and Autocross Timing Equipment

Santa Clara, Ca (April 19, 2010)- RaceAmerica is excited to announce the availability of a rental program for its industry leading Drag Race and Autocross timing systems. The increase in demand from new operators and single event promoters prompted the formation of an official program.

"We decided to offer short term rentals to fill the need for single event operators and promoters starting out who find it difficult to invest in a permanent system. The program will allow them use of the industry's best equipment on short-term basis as their programs develop." said Dennis Laczny, President of RaceAmerica.

The initial systems in the rental program are the [XL Wireless 2700](#) for drag racing and the [AC4 3850](#) for autocross. The AC4 is offered in a wired or hardwired version. Additional items are available to meet individual requirements. Contact RaceAmerica for details and to find out if a RaceAmerica rental system is right for your needs.
