

*The Leader in Event Critical Timing Electronics*

## RACEAMERICA PROVIDES SAFETY LIGHTS FOR THE 2009 PRI/CKI KARTING ALL-STAR CLASSIC

*Santa Clara, California (December 10, 2009)* - RaceAmerica Corporation was on location today for the All-Star Karting Classic in Orlando, Florida operating their new corner safety lights. The annual event takes place at the Performance Racing Industry show and is run by Championship Karting International. The event features a star-studded line-up of drivers from a variety of series including NHRA, IndyCar, Nascar and of course regular contenders in top-level karting.

*"This is our third year at the Performance Racing Industry show but the first year we were involved with the Karting event." said Dennis Laczny, President and co-owner at RaceAmerica. "We are thrilled to be involved in the event and the timing could not be better as we just introduced our new corner safety lights."*

Working with Championship Karting International, RaceAmerica strategically placed 3 wireless corner safety lights on the .5 mile, 9-turn racetrack. The units were operated from a central control point using RaceAmerica's exclusive T-link wireless system. "

RaceAmerica's corner safety lights come in two sizes, are available in both wired and wireless formats, and are operated with individual position selectable controls. For details about RaceAmerica equipment please visit [www.RaceAmerica.com](http://www.RaceAmerica.com)

If you missed the race it will be televised nationally on Fox Sports Net affiliation of cable networks. The Karter division will air on Monday, January 11th, 2010 at 4:30pm local time while the All-Star division will be broadcast on Monday, January 18th, 2010 at 4:30pm. For additional news on the race and other Karting events visit <http://www.championshipkarting.com>.

Founded in 1991, RaceAmerica is the industry leader in advanced event critical timing electronics. The Company designs and manufactures a complete line of portable timing systems, software, and LED-based scoreboards and displays for use in both single and multi-lane snowmobile, autocross, mud bog, soap box derby, ATV, and drag racing, providing a variety of customized solutions for private, commercial, and industrial applications. RaceAmerica is recognized worldwide for their innovativeness, reliability, speed, and accuracy. The Company produced the world's only state-of-the-art, fully wireless drag racing timing system and continues to innovate with flexibility to match unique customer needs. RaceAmerica also supports the thousands of systems that it has operating in over 40 countries with unrivaled customer and technical assistance.
