RaceAmerica Improves Drag Racing's Most Advanced Software

Introduction of XLscore PRO E.08 further enhances world's only wireless drag race system

Santa Clara, Ca (March 31, 2010)- RaceAmerica is excited to announce the release of the latest version of its industry leading drag race software; [XLscore PRO E.08](#). XL ScorePro is by far the industry's most advanced software and continues to benefit from persistent development. Recently, RaceAmerica invested in a new development platform to insure the ability to advance the user experience of its software products now and in the future.

"Our continued development of the XLscore PRO drag race software is based on inputs from the growing number of track operators choosing our wireless system, evolving race formats and our desire to continually improve the user experience," said Dennis Laczny, President of RaceAmerica Corporation. "Improving the functionality in our current software features and creating new features or the 'nice to haves' is paramount to our mission. We encourage input from all drag race operators who want to move forward with us."

The [XL Wireless](#) 2700 is the only fully wireless drag race timing system in the world. The XL system and XLscore PRO software provide an amazing set of **standard** features including:

- 60', 330', mid-track, 1000' and finish ET
- On-the-fly end-of-track length adjustments
- Automated Ladders, No-Ladders and Chicago Shootout eliminations
- Chicago Shootout freeform elimination
- No-Ladders MAX loss options
- Autostart option
- Customizable driver registration interface
- Mid-track, 1000' and Finish Speed
- Integrated LED scoreboard configuration options
- Enhanced Web browsers interface and instructional screens
- Customizable time-slip headers with full reprint capabilities
- Automated quick 4, 8 or 16 classes option
- Unlimited Classes
- Perfect RT =0.000 option
- 5-deep stage Queue w/dial-in
- Numerous race data storage and retrieval options
- Bracket, Pro tree, 400/.500 & multiple seeding options
- Multiple wireless and wired printer capabilities
- Automated Assign-class option
- Points module ready
- Cross talk option

and much more....

The Leader in Event Critical Timing Electronics

"When we demonstrate our software and systems to track operators for the first time they are always amazed at the robust feature set and modern operation. Coupled with the sensor alignment demo, as it only takes seconds to align our industry leading [sensors](#), and our built-in diagnostics functions, they easily understand the vast technological differences between their system and RaceAmerica's," continued Laczny.

The E.08 software operates on the latest PC platforms including windows XP, Vista and 7 and is 32 and 64 bit compatible. Amazingly the software is offered free to current XL 2700 owners who are currently under a RaceAmerica support contract and only \$1135 without a contract. E.08 will be available with all new [XL 2700 wireless drag race systems](#) as well as the option to purchase either a RaceAmerica classic drag tree or the revolutionary LED-based [DTSS Drag tree](#).
